#### 60 APPENDICES

- 60 Appendix 1: Definition of Homelessness
- Appendix 2: Early Childhood Programs
- Appendix 3: Data Sources and Methodology
- 68 Appendix 4: Limitations

Homelessness is a reality for many families with young children in our country. In fact, infancy is the period of life when a person is at highest risk of living in a homeless shelter in the United States (U.S. Department of Housing and Urban Development (HUD), 6th Annual Homelessness Report, 2012).

Children under age 1 comprise 6 percent of the overall population but 12 percent of the population served by HUD-funded Family Shelters. Furthermore, more than 50% of children served by HUD-funded emergency/transitional housing providers in 2012 were age five or younger.

Current research establishes a strong connection between a young child's early experiences and the developing of his or her brain structure. According to the Center on the Developing Child at Harvard University, the early years of life can provide a strong or weak foundation for all future learning, behavior and health.

Experiences of homelessness in early childhood are associated with poor early development and educational well-being. Experiences of homelessness during infancy and toddlerhood are associated with poor academic achievement and engagement in elementary school (Perlman & Fantuzzo, 2010). Additionally, experiences of homelessness are associated with social emotional delays among young children (Haskett, et al, 2015) and poor classroom-based social skills in elementary school (Brumley, Fantuzzo, Perlman, & Zager, 2015). These findings underscore the importance of ensuring that young children who are homeless have access to known supports that are critical to improving the long-term educational outcomes of children nationwide.

Every day more and more Americans understand that high quality early childhood care and learning prepares children to succeed in the classroom and in life. The impact of homelessness on children, especially young children is extremely challenging and may lead to changes in brain architecture that can interfere with learning, social-emotional development, self-regulation and cognitive skills. In today's world, children should be healthy, alert and motivated to have a better chance of leading productive lives. Not every child, however, has that chance.

This 50-state profile project plus the District of Columbia, excluding territories, migrant and tribal information provides a snapshot of early childhood data available for children who are experiencing homelessness in each state. Please see Appendix 3 for methodology.

#### Key national findings:

- 5,975,717 children under 6 years old lived below the Federal Poverty Level in 2013. That
  means that more than one in four children under 6 years old lived below the Federal Poverty
  Level.
- 1,054,218 children were enrolled in Head Start and Early Head Start in 2013. Among the
  enrolled children, 49,515 children experiencing homelessness were served in Head Start and

Early Head Start. In other words, about 4.7 percent of children served in Head Start and Early Head Start are children who were experiencing homelessness. Please see page 5 and 6 for more information.

- 9,890 children ages 18 and under who were experiencing homelessness received meals daily through emergency shelters through the Child and Adult Care Food Program (CACFP) nationally in 2013. See three examples below.
  - New York had the highest number of emergency shelters that provided CACFP at 74. They served an average of 1,221 meals daily to children who were experiencing homelessness in 2013.
  - California had 34 emergency shelters that provided CACFP, and served 1,280 meals daily to children who were experiencing homelessness in 2013.
  - Pennsylvania, a state that had a low rate of children who were experiencing homelessness, had 20 emergency shelters participating in CACFP, and served 865 meals daily for children who are experiencing homelessness in 2013.
- The Department of Housing and Urban Development (HUD) provides shelter for children and families and reports this data to Congress in two categories: Principal Cities and Suburban and Rural Areas. In 2013, 102,973 children experiencing homelessness under 6 years old were in emergency shelter and transitional housing in principal cities, and 14,448 children under 6 years old were in permanent supportive housing in principal cities. In addition, nearly 60,000 children experiencing homelessness under 6 years old were also served in suburban and rural areas.
- Looking at the early childhood data available in the profiles, states with the highest percentage of young children under age 6 experiencing homelessness were:
  - Kentucky 10.6%
  - New York 9.6%
  - o California 9.1%
  - o Alabama 8.6%
  - o Oregon 7.2%
  - Oklahoma 7.1%
  - West Virginia 7.0%
  - o District of Columbia 7.0%
  - New Mexico 7.0%
  - Alaska 6.4%
- States with the lowest percentage of young children under age 6 experiencing homelessness were:
  - Connecticut 1.2%

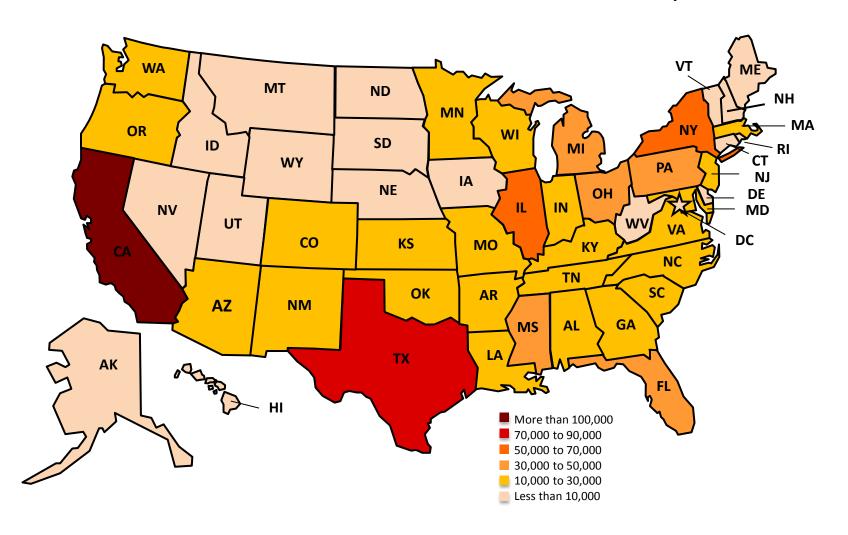

#### **INTRODUCTION**

- O New Jersey 1.4%
- o Rhode Island 1.4%
- O Nebraska 2.1%
- o Hawaii 2.2%
- o Pennsylvania 2.3%
- Wyoming 2.3%
- o South Dakota 2.7%
- o Maine 2.8%
- O Vermont 2.9%
- Hawaii, a state known for a high homeless rate in the United States, had a relatively low rate of children under age 6 who are experiencing homelessness.

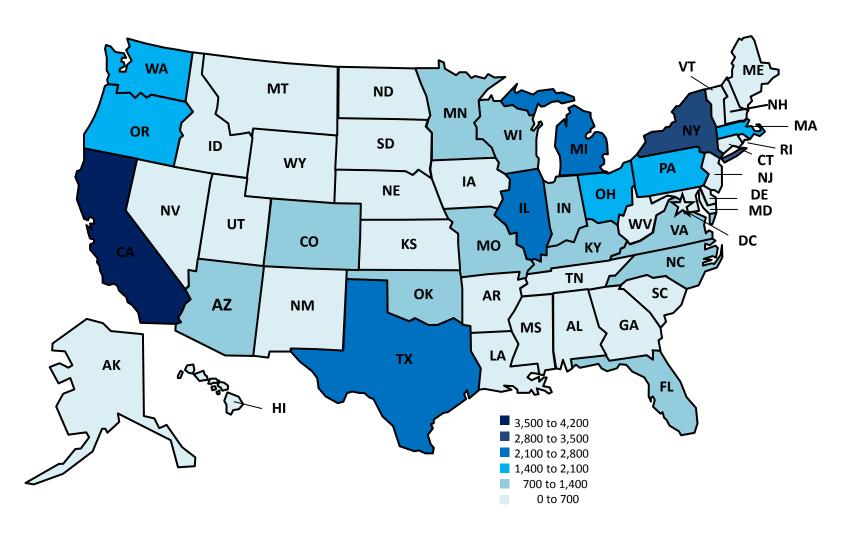

The Office of Early Childhood Development at ACF hopes these profiles will provide information for local, statewide and federal conversations and planning toward the goal of ending family homelessness by 2020.

#### CHILDREN IN EARLY LEARNING PROGRAMS

- Average number of children 18 and under who receive meals in emergency shelters daily is 22 (CACFP/USDA).
- More than 26 percent of children 18 and under lived in households that lacked access to adequate food in 2013 (Children's Defense Fund).
- Nearly one in three children (31.7 percent) under 6 years old lived below the Federal Poverty Level in 2013.
- In the reauthorization of Head Start by the Improving Head Start for School Readiness Act of 2007 (Public Law 110-134), age-eligible children whose families are determined to be homeless are categorically eligible for Head Start and Early Head Start programs. Alabama has 566 Early Head Start-Child Care Partnership and Expansion (EHS-CCP) slots that could expand necessary assistance to homeless children.
- Alabama is considered to have a separate Children's Health Insurance Program (CHIP), but it technically has a combination of Medicaid expansion and CHIP. Current Medicaid covers children under 6 years old up to 141% of Federal Poverty Level (FPL). CHIP covers children up to 312 % of FPL (CMS).

#### CHILDREN IN EARLY LEARNING PROGRAMS

- Average number of children 18 and under who receive meals in emergency shelters daily is 56 (CACFP/USDA).
- 20 percent of children 18 and under lived in households that lacked access to adequate food in 2013 (Children's Defense Fund).
- About one in seven children (14.3 percent) under 6 years old lived below the Federal Poverty Level in 2013.
- In the reauthorization of Head Start by the Improving Head Start for School Readiness Act of 2007 (Public Law 110-134), age-eligible children whose families are determined to be homeless are categorically eligible for Head Start and Early Head Start programs. Alaska has 160 Early Head Start-Child Care Partnership and Expansion (EHS-CCP) slots that could expand necessary assistance to homeless
- Alaska has expanded Medicaid. Current Medicaid covers up to 203 percent of Federal Poverty Level for children under 6 vears old (CMS).

### CHILDREN IN EARLY **LEARNING PROGRAMS**

- Average number of children 18 and under who receive meals in emergency shelters daily is 203 (CACFP/USDA).
- About 28 percent of children 18 and under lived in households that lacked access to adequate food in 2013 (Children's Defense Fund).
- More than one in four children (28.9 percent) under 6 years old lived below the Federal Poverty Level in 2013.
- In the reauthorization of Head Start by the Improving Head Start for School Readiness Act of 2007 (Public Law 110-134), age-eligible children whose families are determined to be homeless are categorically eligible for Head Start and Early Head Start programs. Arizona has 763 Early Head Start-Child Care Partnership and Expansion (EHS-CCP) slots that could expand necessary assistance to homeless children.
  - Arizona is considered to have separate Children's Health Insurance Programs (CHIP), however it technically has a combination of CHIP and Medicaid expansion. With current Medicaid, children aged 0 to 1 year old are covered up to 147 percent of Federal Poverty Level (FPL). Children aged 1 to 5 years old are covered up to 141 percent of FPL. CHIP covers children up to 200 % of FPL (CMS).

#### **STATE STATISTICS &** STATE EFFORTS

- Average number of children 18 and under who receive meals in emergency shelters daily is 1,280 (CACFP/USDA).
- More than 25 percent of children 18 and under lived in households that lacked access to adequate food in 2013 (Children's Defense Fund).
- Nearly one in four children (24.8 percent) under 6 years old lived below the Federal Poverty Level in 2013.
- California has an innovative partnership between First 5 California and counties to help children ages 0 to 5 and their families thrive by increasing high-quality early learning settings. In this innovative approach, children who are experiencing homelessness are one of the priority groups funded.
- In the reauthorization of Head Start by the Improving Head Start for School Readiness Act of 2007 (Public Law 110-134), age-eligible children whose families are determined to be homeless are categorically eligible for Head Start and Early Head Start programs. California has 4,357 Early Head Start-Child Care Partnership and Expansion (EHS-CCP) slots that could expand necessary assistance to homeless children.
  - California has a combination of Medicaid expansion and a separate program. Current Medicaid and Children's Health Insurance Program covers children from up to 261 percent of Federal Poverty Level.

1 United States Census Bureau/American FactFinder, "B17024: AGE BY RATIO OF INCOME TO POVERTY LEVEL IN THE PAST 12 MONTHS," 2013 American Community Survey, U.S. Census Bureau's American Community Survey Office, 2013.

#### CHILDREN IN EARLY LEARNING PROGRAMS

- Average number of children 18 and under who receive meals in emergency shelters daily is 36 (CACFP/USDA).
- Nearly 20 percent of children 18 and under lived in households that lacked access to adequate food in 2013 (Children's Defense Fund).
- More than one in five children (21.4 percent) under 6 years old lived below the Federal Poverty Level in 2013.
- In the reauthorization of Head Start by the Improving Head Start for School Readiness Act of 2007 (Public Law 110-134), age-eligible children whose families are determined to be homeless are categorically eligible for Head Start and Early Head Start programs. Delaware has 72 Early Head Start-Child Care Partnership and Expansion (EHS-CCP) slots that could expand necessary assistance to homeless children.
- The Delaware Interagency Council on Homelessness developed policies and procedures to ensure seamless access and engagement to educational services for homeless children of all ages in 2013.
- Delaware has a combination of Medicaid expansion and a separate program. Current Medicaid covers children age birth to 1 years old up to 212 percent of Federal Poverty Level (FPL), and children age 1 to 5 years old up to 142 percent of FPL. Children's Health Insurance Program covers children up to 212 percent of FPL (CMS).

### CHILDREN IN EARLY LEARNING PROGRAMS

- Average number of children 18 and under who receive meals in emergency shelters daily is 253 (CACFP/USDA).
- More than 18 percent of children 18 and under lived in households that lacked access to adequate food in 2013 (Children's Defense Fund).
- About one in five children (19.6 percent) under 6 years old lived below the Federal Poverty Level in 2013.
- In the reauthorization of Head Start by the Improving Head Start for School Readiness Act of 2007 (Public Law 110-134), age-eligible children whose families are determined to be homeless are categorically eligible for Head Start and Early Head Start programs. New Jersey has 816 Early Head Start-Child Care Partnership and Expansion (EHS-CCP) slots that could expand necessary assistance to homeless children.
- New Jersey has a combination of Medicaid expansion and a separate program. Current Medicaid covers children ages 0 to 1 up to 194 percent of Federal Poverty Level (FPL), and covers children ages 1 to 5 up to 142 percent of FPL. Children's Health Insurance Program covers children up to 350 percent of FPL (CMS).

## CHILDREN IN EARLY LEARNING PROGRAMS

- Average number of children 18 and under who receive meals in emergency shelters daily is 69 (CACFP/USDA).
- More than 25 percent of children 18 and under lived in households that lacked access to adequate food in 2013 (Children's Defense Fund).
- About one in five children (20.3 percent) under 6 years old lived below the Federal Poverty Level in 2013.
- In the reauthorization of Head Start by the Improving Head Start for School Readiness Act of 2007 (Public Law 110-134), age-eligible children whose families are determined to be homeless are categorically eligible for Head Start and Early Head Start programs. Tennessee has 734 Early Head Start-Child Care Partnership and Expansion (EHS-CCP) slots that could expand necessary assistance to homeless children.
- Tennessee has a combination of Medicaid expansion and a separate program. Current Medicaid covers children ages 0 to 1 up to 195 percent of Federal Poverty Level (FPL), and covers children ages 1 to 5 up to 142 percent of FPL. Children's Health Insurance Program covers children up to 250 percent of FPL (CMS).

### **Appendix 1 – Definition of Homelessness**

#### **Federal Definitions**

Homelessness is defined in a number of different ways. Below are Federal definitions and key terms that are used when talking about homeless children and youths.

### The U.S. Department of Education (ED)

Subtitle VII-B of the McKinney-Vento Homeless Assistance Act defines homeless as follows:

The term "homeless children and youths"—

- A. means individuals who lack a fixed, regular, and adequate nighttime residence (within the meaning of section 103(a)(1) of this title); and
- B. includes—
  - children and youths who are sharing the housing of other persons due to loss of housing, economic hardship, or a similar reason; are living in motels, hotels, trailer parks, or camping grounds due to the lack of alternative adequate accommodations; are living in emergency or transitional shelters; are abandoned in hospitals; or are awaiting foster care placement;
  - ii. children and youths who have a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings (within the meaning of section 103(a)(2)(C) of this title);
  - iii. children and youths who are living in cars, parks, public spaces, abandoned buildings, substandard housing, bus or train stations, or similar settings; and
  - iv. migratory children (as such term is defined in section 6399 of title 20) who qualify as homeless for the purposes of this subtitle because the children are living in circumstances described in clauses (i) through (iii).

42 U.S.C. § 11434a(2)

Both the Individuals with Disabilities Act (IDEA) and the Improving Head Start for School Readiness Act follow this Department of Education definition for services for young children.

#### The U.S. Department of Housing and Urban Development (HUD)

HUD defines homelessness for their program into four categories. The categories are:

#### **Category 1:** Literally Homeless

Individual or family who lacks a fixed, regular, and adequate nighttime residence, meaning:

- (i) Has a primary nighttime residence that is a public or private place not meant for human habitation;
- (ii) Is living in a publicly or privately operated shelter designated to provide temporary living arrangements (including congregate shelters, transitional housing, and hotels

### **Appendix 1 – Definition of Homelessness**

- and motels paid for by charitable organizations or by federal, state and local government programs); or
- (iii) Is exiting an institution where (s)he has resided for 90 days or less and who resided in an emergency shelter or place not meant for human habitation immediately before entering that institution

### **Category 2:** Imminent Risk of Homelessness

Individual or family who will imminently lose their primary nighttime residence, provided that:

- (i) Residence will be lost within 14 days of the date of application for homeless assistance;
- (ii) No subsequent residence has been identified; and (iii) the individual or family lacks the resources or support networks needed to obtain other permanent housing

### **Category 3:** Homeless under other Federal statutes

Unaccompanied youth under 25 years of age, or families with children and youth, who do not otherwise qualify as homeless under this definition, but who:

- (i) Are defined as homeless under the other listed federal statutes;
- (ii) Have not had a lease, ownership interest, or occupancy agreement in permanent housing during the 60 days prior to the homeless assistance application;
- (iii) Have experienced persistent instability as measured by two moves or more during in the preceding 60 days; and
- (iv) Can be expected to continue in such status for an extended period of time due to special needs or barriers

### **Category 4:** Fleeing/Attempting to Flee Domestic Violence

- Any individual or family who:
  - (i) Is fleeing or attempting to flee their housing or the place they are staying because of domestic violence, dating violence, sexual assault, stalking, or other dangerous or lifethreatening conditions related to violence that has taken place in the house or has made them afraid to return to the house, including:
    - Trafficking
    - Physical abuse
    - Violence (or perceived threat of violence) because of the youth's sexual orientation;
  - (ii) Has no other residence; and
  - (iii) Lacks the resources or support networks to obtain other permanent housing.

### **Appendix 2 – Early Childhood Programs**

### **HEAD START**

Head Start, administered by the Office of Head Start (OHS) at the Administration for Children and Families is a comprehensive child development program that serves children from birth to age five, pregnant women, and their families. It is a child-focused, multi-generational program with the overall goal of increasing the school readiness of young children in low-income families. The children of families experiencing homelessness are categorically eligible for Head Start and are identified and prioritized for enrollment. The children of families experiencing homelessness can apply, enroll and attend while documents are collected in a reasonable time frame. Head Start directly serves children experiencing homelessness from birth to five years old and provides children and their families with services related to nutrition, developmental, medical and dental screenings, immunizations, mental health and social services referrals, family engagement, and in some cases transportation.

Head Start was reauthorized by the Improving Head Start for School Readiness Act of 2007 (Public Law 110-134). In this reauthorization, age-eligible children whose families are determined to be homeless are categorically eligible for Head Start and Early Head Start programs. Many Head Start grantees serve families experiencing homelessness through home-based and center-based programs, both of which provide many supportive services to children and families regardless of their living circumstances.

#### EARLY HEAD START-CHILD CARE PARTNERSHIP

The Early Head Start-Child Care Partnerships (EHS-CCP) and Expansion program is a competitive grant opportunity to support the partnering of Early Head Start programs with local child care providers. Under EHS-CCP, new or existing Early Head Start grantees partner with regulated center-based or family child care providers serving infants and toddlers from low-income families while agreeing to meet the Head Start Program Performance Standards. The purpose of this program is to expand high quality early learning opportunities to infants and toddlers through EHS-CC Partnerships. Children who are experiencing homelessness may be able to receive assistance through this project.

#### CHILD CARE AND DEVELOPMENT FUND

The Child Care and Development Fund (CCDF), administered by the Office of Child Care (OCC) at the Administration for Children and Families, is a Federal and State partnership that promotes family economic self-sufficiency and helps children succeed in school and life through affordable, high-quality early care and afterschool programs. Subsidized child care services are available to eligible families through certificates (vouchers), or grants and contracts with providers. Nearly 1.5 million children receive a child care subsidy from the CCDF program every month.

As a block grant, this program offers States, territories, and tribes significant flexibility in designing their CCDF policies, including the ability to define eligibility and prioritize resources. OCC encourages

### **Appendix 2 – Early Childhood Programs**

States to leverage this flexibility to offer access to the most vulnerable populations, including families experiencing homelessness.

On November 19, 2014, the President signed the Child Care and Development Block Grant (CCDBG) Act of 2014, which authorizes the Child Care and Development Fund. The law, which Congress passed with strong bipartisan support, reauthorizes the child care program for the first time since 1996 and represents an historic re-envisioning of the CCDF program. This reauthorization of CCDF includes significant changes in defining health and safety requirements for child care providers, outlining family-friendly eligibility policies, expanding quality improvement efforts, and ensuring parents and the public have transparent information about the child care choices available to them. One of these changes is requiring States to report whether children receiving assistance are homeless children. Collecting this data will be important for tracking performance on serving children and families who are experiencing homelessness.

The 50-state profile compiles data and information from multiple sources with a purpose of ensuring that young children who are experiencing homelessness have access to high quality education and care. Due to the importance of the early childhood period, the 50-state profile predominantly focuses on children under the age of 6. However, when data for under age 6 was not available, data sources that include 18 years of age and under are used. Data links are also listed below.

#### **Data Sources**

• The National Center on Family Homelessness Data on Early Childhood Homelessness
The National Center on Family Homelessness uses U.S. Department of Education McKinneyVento 2013 Educational Data to estimate the number of young children who are experiencing
homelessness. Because the most current research estimates that 51% of the total number of
homeless children are under the age of 6 (Samuels, Shinn & Buckner, 2010; HUD, 2009), the ED
count of K-12 homeless children represents 49% of the total number of homeless children. Using
the AIR methodology described in the link below, this project takes AIR's 2012-2013 number for
the total number of all children (18 years and under) experiencing homelessness in each state, and
multiplies this number by .51 to provide an estimate of the number of children under 6 who
experienced homelessness. For more information about the methodology, please
visit: http://www.homelesschildrenamerica.org/mediadocs/282.pdf

#### Education for Homeless Children and Youth Program (ED)

Data used for this project are from data submitted by public local educational agencies (LEAs) for the School Years 2010-2011 thru 2012-2013 Consolidated State Performance Report (CSPR). Data are included for both grantee and non-grantee LEAs and represent a full school year of data. Children who are "enrolled" in the program are also considered served. Students are considered "served" if they received assistance as a result of the LEA's receipt of McKinney-Vento grant funds. For more information about the methodology of the CSPR, please visit: <a href="http://www2.ed.gov/admins/lead/account/consolidated/index.html">http://www2.ed.gov/admins/lead/account/consolidated/index.html</a>

It is important to note that this project uses student enrolled data for ages 3-5. Since there was no data available for 0-2 ages "enrolled" for FY12-13, children "served" data was used for this age group.

#### Head Start and Early Head Start (HHS):

Data submitted by Head Start, Early Head Start and Tribal and Migrant Head Start grantees are collected using the Program Information Report (PIR) and represent a full program year of data for 2013. Children enrolled in the program are also considered served. Since Head Start and Early Head Start grants go directly to the local and community level, the profile project

aggregates community level data to state level for the purpose of the profile. http://eclkc.ohs.acf.hhs.gov/hslc/data/pir

EHS-CCP data includes the number of grants, partnership slots, expansion slots, total enrollment, state enrollment and amount of funding awarded. This new data released in 2015 is included in the profile project as a resource as communities plan services for infants and toddlers experiencing homelessness. <a href="http://www.acf.hhs.gov/programs/ecd/early-learning/ehs-cc-partnerships/grant-awardees">http://www.acf.hhs.gov/programs/ecd/early-learning/ehs-cc-partnerships/grant-awardees</a>

#### • United States Census Bureau American Community Survey:

American Community Survey data for 2013 by age ratio of income is used for total children population under the age of 6. <a href="http://www.census.gov/programs-surveys/acs">http://www.census.gov/programs-surveys/acs</a>

### Center for Medicare and Medicaid Services data (CMS):

Children's Health Insurance Program information on income eligibility is used for state efforts/statistics for children's health coverage. <a href="http://www.medicaid.gov/medicaid-chip-program-information/program-information/downloads/medicaid-and-chip-eligibility-levels-table.pdf">http://www.medicaid.gov/medicaid-chip-program-information/program-information/downloads/medicaid-and-chip-eligibility-levels-table.pdf</a> See the map Children's Health Insurance Program Plan Activity as of May 1, 2015 at <a href="http://www.medicaid.gov/chip/downloads/chip-map.pdf">http://www.medicaid.gov/chip/downloads/chip-map.pdf</a>

### Child and Adult Care Food Program (CACFP)

The Department of Agriculture, Office of Child Nutrition collects data on the Child and Adult Care Food Program (CACFP) and the average number of children who receive meals while temporarily residing in the emergency shelters during Fiscal Year 2014. This data is a different program year than other data presented in the profiles. In addition, this number includes children under the age of 18. <a href="http://www.fns.usda.gov/cacfp/meals-emergency-shelters">http://www.fns.usda.gov/cacfp/meals-emergency-shelters</a>

### • Children's Defense Fund

This profile uses information on food security from the Children's Defense Fund from 2013 as part of state efforts and statistics. <a href="http://www.childrensdefense.org/library/data/state-data-repository/children-in-the-states-2013.html">http://www.childrensdefense.org/library/data/state-data-repository/children-in-the-states-2013.html</a>

#### United States Department of Housing and Urban Development (HUD)

Data is submitted by grantees to HUD via the Annual Performance Report (APR), with all data to be submitted no later than 30 days after the close of the program year. Due dates are dictated by the terms of each program's grant contract with HUD. Individual grantees submit APR data directly to HUD and individual Continuum of Care programs may use HMIS that are not compatible with other HMIS. As a result, HUD APR data may include duplicate data. To learn more about the APR, please visit https://www.hudexchange.info/e-snaps/guides/apr

#### Methodology

The Education for Homeless Children and Youth Program significantly undercounts or does not include children under age 3. To adequately estimate the population who are experiencing homelessness, the 50-state profile employs the formula that National Center for Family Homelessness used in "America's Youngest Outcasts: A Report Card on Child Homelessness<sup>1</sup>". Based on many studies and HUD's data on this population (Samuels, Shinn & Buckner, 2010; HUD, 2009), 51 percent of the total number of children who are experiencing homelessness are under the age of 6. Therefore, the number count of K-12 in the Education for Homeless Children and Youth Program data represents 49 percent of total number of children who are experiencing homelessness. Given this information, a ratio to calculate the total number of children who are experiencing homelessness in each state, and estimated number of children who are experiencing homelessness under the age of 6 can be deduced. Following is the illustration of the estimation:

Total number of children who are experiencing homelessness  $\times$  (49/100) = Number of K-12 children who are experiencing homelessness

Total number of children who are experiencing homelessness  $\times$  (49/100) = 1,216,934

Therefore, the total number of children who are experiencing homelessness is 2,483,539 in the U.S, and the number of children who are experiencing homelessness under the age of 6 is 1,266,605. Employing the same method, the profile obtains the count for children who are experiencing homelessness under the age of 6 for each state.

Using this AIR methodology, this project takes AIR's 2012-13 number for the total number of all children (18 and under) experiencing homelessness in each state, and multiplies this number by (51/100), to provide an estimate of the number of children under age 6 who experienced homelessness in a given state in 2012-13.

By dividing the total number of children under the age of 6 using US Census American Community Survey 1-year estimate data for 2013 (23,535,026), the profile finds that one in eleven children under the age of 6 was experiencing homelessness in 2013.

### **Appendix 4 – Limitations**

The Department of Education(ED) data is used as a primary source for estimating the total population of children who are experiencing homelessness under the age of 6 because it comprehensively assesses the number of children who are experiencing homelessness by state. All school districts are required to report complete data sets; however not all school districts provided the data sets. Moreover, data includes children who are enrolled in public schools only. Because of these reasons, the estimated count for the total population of children who are experiencing homelessness under the age of 6 is significantly undercounted.

Although Head Start and Early Head Start data serving children who are experiencing homelessness is available for the estimation, the data is collected at the local level; therefore there are limitations to estimating the number of children who are experiencing homelessness by state. As discussed previously, the data contained in these profiles may include duplicate data.

Despite these limitations, the ED data is the best data available nationally for the purpose of developing state profiles on early childhood homelessness. Efforts to improve data on early childhood homelessness may be possible with the new provision in the reauthorization of the Child Care Development Block Grant for collecting data on children and families who are experiencing homelessness.
