## A National Overview of Grantee CLASS® Scores in 2016

During the 2015-2016 program year, the Office of Head Start (OHS) used the Classroom Assessment Scoring System (CLASS ${ }^{\circledR}$ ) Pre-K Teacher-Child Observation Instrument during its on-site reviews of grantees. CLASS ${ }^{\circledR}$-reliable reviewers visited a random sample of preschool classrooms to obtain granteelevel scores. This document provides descriptive statistics of the 2016 grantee-level CLASS ${ }^{\circledR}$ data.

For more information, see: Use of CLASS ${ }^{\circledR}$ in Head Start, available on the ECLKC. Individual grantee CLASS ${ }^{\circledR}$ reports also are available on the ECLKC in the Program Service Reports.

## National Statistics by Dimension

In 2016, 319 Head Start grantees received CLASS ${ }^{\circledR}$ reviews. The CLASS ${ }^{\circledR}$ tool has 10 dimensions of teacher-child interactions rated on a 7-point scale, from low to high. The 10 CLASS ${ }^{\circledR}$ dimensions are organized into three domains: Emotional Support, Classroom Organization, and Instructional Support.

- Emotional Support assesses the degree to which teachers establish and promote a positive climate in their classroom through their everyday interactions.
- Classroom Organization assesses classroom routines and procedures related to the organization and management of children's behavior, time, and attention in the classroom.
- Instructional Support assesses the ways in which teachers implement the curriculum to effectively promote cognitive and language development.

| OHS CLASS ${ }^{\circledR}$ Descriptive Statistics, 2016 National Grantee-Level Scores by Dimension |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Domain | Dimension | Mean | Standard Deviation | Minimum | Maximum |
| Emotional Support | Positive Climate | 5.93 | 0.36 | 4.80 | 6.86 |
|  | Negative Climate | 1.06 | 0.08 | 1.00 | 1.47 |
|  | Teacher Sensitivity | 5.82 | 0.42 | 4.33 | 6.86 |
|  | Regard for Student Perspectives | 5.30 | 0.50 | 3.75 | 6.54 |
| Classroom Organization | Behavior Management | 5.95 | 0.40 | 4.73 | 6.96 |
|  | Productivity | 6.05 | 0.36 | 4.75 | 6.93 |
|  | Instructional Learning Formats | 5.20 | 0.48 | 3.20 | 6.20 |
| Instructional Support | Concept Development | 2.33 | 0.54 | 1.30 | 4.82 |
|  | Quality of Feedback | 2.80 | 0.60 | 1.50 | 5.32 |
|  | Language Modeling | 3.35 | 0.56 | 1.70 | 5.36 |

## National Statistics by Domain

Grantee-level dimension scores are averaged to produce grantee-level domain scores.* Previous largescale studies of CLASS ${ }^{\circledR}$ have shown that the average preschool classroom scores are higher in the domains of Emotional Support and Classroom Organization than in the domain of Instructional Support.

| OHS CLASS <br>  <br> National Grantee-Level Scores by Dose |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
| Domain | Mean | Standard <br> Deviation | Minimum | Maximum |
| Emotional Support | 6.00 | 0.29 | 4.95 | 6.77 |
| Classroom Organization | 5.73 | 0.35 | 4.67 | 6.55 |
| Instructional Support | 2.83 | 0.52 | 1.62 | 5.17 |

*Note: To calculate the Emotional Support domain, subtract the Negative Climate score from 8, add the Positive Climate, Teacher Sensitivity, and Regard for Student Perspective scores, then divide by 4.

## Distribution by Domain

The following table and graphs provide additional information on how grantee-level domain scores are distributed nationally.

| OHS CLASS ${ }^{\circledR}$ Descriptive Statistics, 2016 |  |  |  |
| :---: | :---: | :---: | :---: |
| National Distribution of Grantee-Level Domain Scores |  |  |  |
| Domain | Lowest 10\% | Median (50\%) | Highest 10\% |
| Emotional Support | 5.5952 | 6.04 | 6.35 |
| Classroom Organization | 5.2500 | 5.76 | 6.15 |
| Instructional Support | 2.2222 | 2.74 | 3.53 |

## Glossary

Mean: the average value, calculated by summing all scores and dividing by the number of scores Median: the middle value, where half the scores are below this point and half are above it N : the total number of values in a set
Standard Deviation: a value that shows how much variation exists in a set of data. There are two types of standard deviation (i.e. sample and population). We use the population standard deviation because this dataset includes all 2016 CLASS ${ }^{\circledR}$ scores.
