#### **Commonly Asked Questions**

#### Q: How did you get my address?

A: Your address was randomly selected from among all of the home addresses in the nation. It was selected using scientific sampling methods to represent other households in the United States.

#### Q: How did you get my child's name and age?

A: When you returned the initial National Household Education Survey to us, we randomly chose one child to ask additional questions about. We are interested in understanding your child's experiences with care and early education.

#### Q: Why should I take part in this study? Do I have to do this?

A: You represent thousands of other households like yours, and you cannot be replaced. Your answers and opinions are very important to the success of this study. You may choose not to answer any or all questions in this survey. In order for the survey to be representative, it is important that you complete and return this questionnaire. Those who do not return the survey will not be represented in key statistics used by policymakers and researchers.

#### Q: How will the information I provide be used? Will my privacy be protected?

A: Your responses will be combined with those of others to produce statistical summaries and reports. Your individual data will not be reported. Your answers may be used only for statistical purposes and may not be disclosed, or used, in identifiable form for any other purpose except as required by law (Section 9573, 20 U.S. Code).

### Q: I have more than one child in my household. Will I receive additional surveys for the other children in my household?

A: No, each household will receive a survey for only one child, even if there are multiple children living in the household. In households with multiple children, one child was randomly selected to be included in the study.

#### Q: How will my response help the Department of Education?

A: The Department of Education wants to understand the care and early education of children. This survey is the only way that the Department of Education can learn about the types of care and early learning activities children receive. Your responses will be combined with those from other households to inform educators, policymakers, schools, and universities about changes in the condition of education in the United States. Reports from past surveys can be found at www.nces.ed.gov/nhes.

#### Q: Who is sponsoring the study? Is this study conducted by the Federal Government?

A: The National Center for Education Statistics, within the Department of Education, is authorized to conduct this study (Section 9543, 20 U.S. Code). This study has been approved by the Office of Management and Budget, the office that reviews all federally sponsored surveys. The approval number assigned to this study is 1850-0768. You may send any comments about this survey, including its length, to the Federal Government. Write to: Andrew Zukerberg, National Center for Education Statistics, U.S. Department of Education, 1990 K Street NW, Room 9036, Washington, DC 20006-5650. You may send email to NHES@census.gov. If you have any questions about the study, contact us toll-free at 1-888-840-8353.
